

Complete with an instruction manual.

Astra Archery is proud to present the Shot Trainer form aide. Now, learning how to shoot a strong shot without collapsing on the release is comfortable, convenient, and controllable. The Shot Trainer is fully adjustable to fit almost any body type or size, comfortably wrapping around the drawing arm in Nobel Prize winning Olefin fabric, made by Swiftwick. Durable parachute cord connects the Shot Trainer to the bow string, providing a secure, yet non-destructive attachment. Simply detach the stainless steel snap-hook to quickly and conveniently retrieve arrows. 100% made in the USA.

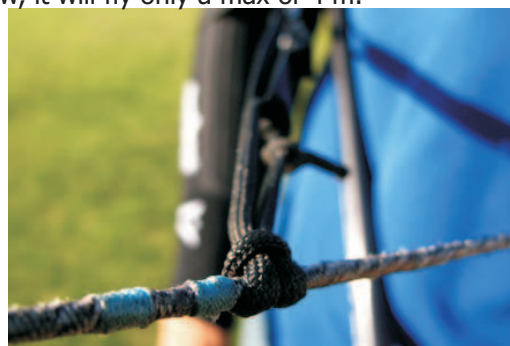

Detach the stainless steel snap-hook for easy retrieval of arrows or walking around.

The elbow sleeve protects the forearm from cuts or bruises, ensuring comfortable practice. You can use the shot trainer with or without the arrow. If you use the arrow, it will fly only a max of 4 m.

The adjustable center strap ensures perfect fit in a matter of seconds. Now, friends and training partners can borrow your Shot Trainer without any extra setup.

Soft, pliable, yet strong parachute cording loops around the bowstring with a rock-solid connection that won't damage your string serving.

Code 53F344 ASTRA SHOT TRAINER
