FLETCHING JIG USER MANUAL

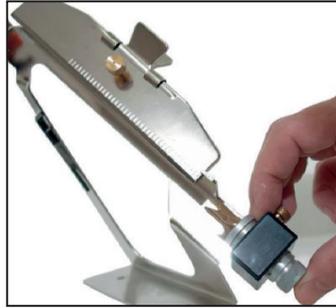

The fletching jig can be set to fletch arrows with 3, 4 or 6 vanes or feathers for a recurve or compound bow set up.

The jig comes standard as a 3 fletch recurve and can easily be adjusted to a 90° compound set up through the following steps:

1. Loosen the retaining screw.

2. Lift the locator barrel till you can reach the set screw.

3. Loosen the set screw using the smallest hex key included with the fletching jig.

4. Turn the nock receiver 90°, align with the engraved index line then re-tighten the set screw, now your fletching jig is set-up for compound.

The jig comes standard as a 3 fletch and can easily be adjusted to a 4 or 6 fletch through the following steps:

1. Unscrew the retaining screw as in image No.1
2. Lift the locator barrel till past the first groove for 4 fletch or the second groove for 6 fletch as shown in image 2.
3. Fix retainer screw.

Set the fletch angle through the following steps:

1. Loosen slightly the two set screws with the largest hex key
2. Adjust to the required position and retighten the screws.

How to set the jig to match your arrow:

1. Fit the arrow shaft into the jig, making sure that it is fully seated onto the nock receiver.

2. Adjust to the required position and re-tighten the screws.
Now you are ready to start fletching.
