UPSTABILIZER

Soma offers a vibration damper system to fix directly to the riser. Compared to many other systems available on the market this damper is particularly effective thanks to its structure, which is quite different from the other solutions.

Thread to apply the Upstabilizer to the riser. The most common position used is on top, to have the best results.

6 colors to choose among in order to find the preferred match with your riser color..

Soma Upstabilizer is surely something you ought to test on your bow.
