

ELITE

THE WORLD'S MOST SHOOTABLE BOW

SHOOTABILITY ELEVATED.

The new Elite ReVol is an engineering marvel of tack driving accuracy and shootability. With industry leading efficiency ratings, the ReVol delivers an amazing 333 fps, while providing the stability of 35" axle-to-axle length and 7" brace height. The ReVol's skeletal riser and dual cage design, made possible by 7075 T6 aluminum, provides an incredibly rigid riser platform that out aims the competition. The new high performance, ReVol cam system is built to perform while the LTR cable management system provides the ultimate in fine tuning. From the woods to the 3D range to indoor and outdoor target, the ReVol was designed to bring accuracy and shootability to the next level.
